EDUCATION

Oxford Brookes University (Exchange at Université Dauphine Paris 2025/26) **Paris, France**

Bachelor of Science in Economics, Finance, and International Business *Sep 2023 – Jun 2027*

- Cumulative GPA : On track for First-Class Honours
- Expected Graduation: 2027
- Relevant coursework: Econometrics, Financial Modelling, Corporate Finance and Microeconomics

Charterhouse **Surrey, United Kingdom**

Secondary School *Sep 2017 – Jul 2023*

- A-levels: Maths, Economics, French
- Achieved DELF B2 certification in French; Gold in the BPhO Intermediate Physics Challenge; Silver in the UKMT Senior Maths Challenge; Edexcel Level 3 Award in Algebra
- IGCSEs: Maths, Physics, Chemistry, Biology, English Lit/Lang, French, Spanish, History, Art, Geography

WORK EXPERIENCE

Avington Park **Hampshire, United Kingdom**

Guest Manager *June 2024 – Sep 2024*

- Managed a large-scale operations team overseeing event logistics, client check-in, and guest support across high-profile venues. Led the reorganisation of guest check-in procedures, reducing wait times by 10%.
- Played a key role in project planning and coordination for large-scale events, demonstrating strong organisational skills and attention to detail

Jura Consulting **Winchester, United Kingdom**

Junior Analyst (Part-Time) *Sep 2021 – 2026*

- Assisted the managing director with financial work including through the use of **Xero**.
- Built and maintained financial models in Excel to support investment decisions; digitised company records, improving operational efficiency.

Nicolas James Group **Southampton, United Kingdom**

Intern *June 2023 – Aug 2023*

- Supported operational planning across business functions, coordinating logistics, stakeholder communications and documentation
- Set up and maintained administrative systems, ensuring accurate record-keeping and compliance with internal procedures

TECHNICAL PROJECTS

- **orderbook-sim —** limit order book reconstruction and simulator (Python): rebuilds an exchange book from raw feed messages at ~393,000 events/sec and tests whether passive orders would have filled under three queue-position models; integer-tick arithmetic, gap-detected sequencing, 115 tests.
- **orderbook-live —** live order-book tool (TypeScript): reconstructs Coinbase market depth in the browser and estimates a passive order's fill probability over the next 30 seconds, with VWAP and slippage impact analytics. Deployed as a live web app.
- **honest-backtest:** transaction-cost-aware equity backtester (Python): a daily mean-reversion strategy earning 8.4%/yr gross flips to −2.0% net once commission, spread, slippage and market impact are charged (114% cost drag).
- **rent-or-buy:** Monte-Carlo rent-vs-buy model (TypeScript): integer-cent mortgage amortisation and a sensitivity 'tornado' show the decision is a coin flip hostage to the home-appreciation assumption. Deployed as a live web app.
- **whose-inflation:** reconstructed US CPI from eight component indices to a 0.083pp mean error over 101 months (Python), then re-weighted the basket to show households diverge ~3× in an inflation shock; shipped as a live browser calculator.
- **trade-mirror:** reconciled both sides of 39 countries' trade ledgers from UN Comtrade (Python); found the global importer/exporter total comes out 'impossible' and traced it to Rotterdam entrepôt flows.

LEADERSHIP

Bloomberg Trading Challenge (Investment Society) **Oxford Brookes University**
Team Leader *Oct 2024 – November 2024*

- Led a team running a live equity portfolio, sourcing and debating new trade ideas each week
- Invested actively in US and UK equities with a focus on artificial-intelligence names; executed 24 successful trades for 16.4% portfolio growth over the 2024 Bloomberg Trading Challenge
- Presented weekly research reports to the team, covering company analysis and investment theses

SKILLS AND CERTIFICATIONS

- Technical: Python (pandas, NumPy), R, TypeScript, SQL, Git, financial modelling, data analysis, advanced Microsoft Excel, Bloomberg Terminal
- Quantitative: market microstructure and order-book dynamics, transaction-cost and slippage modelling, Monte-Carlo simulation, econometrics and time-series analysis, valuation and financial modelling
- Certifications: Bloomberg Market Concepts (BMC) and CFA Institute Investment Foundations
- Languages: Bilingual in French and English, Professional proficiency in Spanish

VOLUNTEERING AND INTERESTS

- Participated in charitable projects in aid of The NHS in 2021 with The National Citizen Service Trust
- Interests: Athletics (best time in Surrey and top 100 in the UK for hurdles, 2022), competitive skiing (Giant Slalom and Slalom), football, financial markets and AI modelling.
